## **DETAILED ACTION**

### ***Response to Amendment***

In response to the Request for Continued Examination (RCE) filed July 27, 2005 in which the applicant previously canceled claims 1-29, amends claims 30 and 51, and claims 30-52 are pending in this application.

## **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Presson Reg. No. 41,442 on September 29, 2005.

The application has been amended as follows:

Pleas add to claim 39, line 2 --(charged coupled device)-- between the words CCD and device.

### ***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance: Applicant's have amended the claims to be patentably distinct over the prior art. The prior art does not disclose nor teaches according claims 30 and 51 a control unit, coupled to the condition unit, adapted to generate control signals as a function of the condition signals and provide the control signals to the emitting

Art Unit: 3714

unit to control operation of the emitting unit, wherein the control signals are a function of a strength of a desire. The prior art Kamiya only discloses a pseudo-emotion of the object for deciding output of the object, in relation to the user's state and formulating emotion generation algorithms to establish the relationship between the user's state and pseudo-emotion. The behavior decision algorithms are formulated to establish the relationship between input, including the pseudo-emotions, and the behavior of the object. The user's state is detected and a pseudo-emotion of the object is generated based on the user's state using the emotion generation algorithms. Kamiya does not disclose the generating of control signals as a function of the condition signals and provide the control signals to the emitting unit to control operation of the emitting unit wherein the control signal are a function of a strength of desire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
